

ARADHYA STUTI

Ghaziabad, Uttar Pradesh, India — +91 62073 38129 — aradhyastuti05@gmail.com
linkedin.com/in/aradhya-stuti-9b2b9529a — github.com/AradhyaStuti — Google Scholar — Portfolio

Summary

AI/ML Engineer with strong full-stack MERN expertise. Build production-ready systems across Computer Vision, Retrieval-Augmented Generation, Deep Learning, and real-time web — using Python, PyTorch, TensorFlow, FastAPI, MongoDB, Express, React, Node.js, and Docker. IEEE-published on multimodal depression prediction. Internships shipping production code, on deployed AI, Full-stack and Deep Learning work.

Education

Bachelor of Technology in Information Technology August 2023 – April 2027
Raj Kumar Goel Institute of Technology, affiliated to AKTU CGPA: 8.32 / 10.0
Coursework: Probability & Statistics, Machine Learning, Artificial Intelligence, Data Structures & Algorithms, DBMS, Computer Networks, Operating Systems, Theory of Computation, OOP, Distributed Systems Concepts.

Publications

A Multimodal Approach for Depression Prediction — **IEEE AECE 2025**
DOI: 10.1109/AECE67531.2025.11386544

- Evaluated a multimodal depression prediction framework, conducting ablation studies and benchmarking against unimodal baselines; research published in IEEE Xplore.

Experience

Software Developer Intern – Adanas Technology March 2026 – May 2026
Remote, India

- Developed full-stack veterinary ERP (React + Redux Toolkit + Django REST); Redis caching for performance optimization.
- Designed a LangChain WhatsApp chatbot over 100+ patient records.

Generative AI Intern – Infosys Springboard November 2025 – January 2026
Remote, India
github.com/AradhyaStuti/AI.PCB.Defect.Detection

- Architected SSIM + pHash + NMS pipeline with fine-tuned ResNet-50, reaching **98.2%** on DeepPCB (6 classes).
- Containerized FastAPI + Streamlit inference on Docker; automated pytest, ruff, mypy via 4-job GitHub Actions CI.

Projects

Seelenruh – Multi-Persona Generative AI Assistant
github.com/AradhyaStuti/Seelenruh-GenAI-Assistant — Live

- Shipped FastAPI + React on Docker and Hugging Face Spaces with MongoDB Atlas, JWT auth, SSE-streamed responses.
- Routed 4 LLM domains (Groq LLaMA-3 + LangGraph) over FAISS RAG with cross-encoder reranking; EN/HI/DE multilingual.

Student Depression Risk Prediction – Deep Learning System
github.com/AradhyaStuti/Student-Depression-Prediction — Live

- Benchmarked a PyTorch network against logistic regression for depression-risk prediction across 28K rows.
- Validated with 5-fold cross-validation: **ROC-AUC 0.92, F1 0.87, accuracy 0.85.**

Technical Skills

Languages: Python, JavaScript, SQL

AI & Machine Learning: Supervised/Unsupervised Learning, Feature Engineering, Hyperparameter Tuning, Model Optimization, Computer Vision, RAG, LLMs, NLP, Generative AI, Prompt Engineering, Multimodal Modeling

Libraries & Frameworks: PyTorch, TensorFlow, Scikit-Learn, Pandas, NumPy, Matplotlib, OpenCV, torchvision, LangChain

Full-Stack & MERN: MongoDB, Express, React, Node.js, Redux Toolkit, HTML, CSS, Tailwind, REST APIs

Backend: FastAPI, Flask, Django, Redis

DevOps & Tools: Docker, Git, GitHub Actions (CI/CD), Linux, pytest, Postman, Streamlit, Kubernetes

Languages Spoken: English, Hindi, German

Certifications

Deep Learning for Developers — Artificial Intelligence Primer — Prompt Engineering – Infosys Springboard
Internet of Things and Cloud Computing – NPTEL
